

BANDAGE SHOE / HEEL PROTECTOR

Uniquely compiled stuffing which creates an ideal distribution of pressure.

Leaves open space around the heel, malleolus and the achilles tendon.

REBACARE®'S BANDAGE SHOE / HEEL PROTECTOR IS MEANT:

- For *preventive* and *curative* use for patients with a risk of getting heel pressure ulcers (decubitus).
- To *bridge the time* during which patients cannot wear their own shoes because of wounds, phlebology or lymphatic disorders.

REBACARE®'S BANDAGE SHOE / HEEL PROTECTOR CAN SAVE EXTRA COSTS BECAUSE:

- It improves the patients mobility, which lessens the duration of time the patient needs care.
- It enables fast healing of a wound, which lessens the duration of time the patient needs care.

REBACARE®'s bandage shoe / heel protector can gain your institute a good prevalence score.
